

BioBag® is bio-based and certified 100% compostable as well as recyclable and burnable. Made from cornstarch, these bags help eliminate regular plastic bags from our environment. When disposed, BioBags will biodegrade as naturally as food scraps, leaving no harmful residue. Even the branding on the outside is eco-friendly being soy based. Biobags are GMO free and DEBIO certifies for use in organic agriculture.

**In stock bio-based products manufactured from renewable resources**
